

Covid-19 Update

Throughout the pandemic, we have strived to make our GP Practices as safe as possible for our patients and staff.

Therefore, from the 19th July 2021, our GP Practices will not be making any changes.

Patients will still need to
Wear a mask
Socially distance
Use hand sanitiser

Our patient facing staff will continue to
wear PPE

We do understand that it can be frustrating but we know that when patients come to us they may be sick and vulnerable and some cannot receive the Covid vaccine due to medical reasons, so we feel it would be wrong to not continue with these small precautions that can help to protect the patients and staff of the GP Practices within Chester Central Primary Care Network.

Thank you in advance for your cooperation
